--BACKGROUND OF THE INVENTION--;

--1. Field of the Invention--;

Page 1, first full paragraph:

-- The invention concerns a motor vehicle with a collapsible roof ~~in accordance with the introductory clause of Claim 1 and in accordance with the introductory clause of Claim 10~~.--

Page 1, after the first paragraph, insert

--2. Description of the Related Art--;

Page 1, after the second full paragraph, insert:

--SUMMARY OF THE INVENTION--

Page 1, last paragraph bridging page 2:

-- The invention solves this problem with a convertible vehicle ~~with the features of Claim 1 and with a roof with the features of Claim 10. Advantageous modifications of the invention are specified in the dependent Claims 2 to 9 and 11.~~ with a roof with at least two parts, which have painted areas, especially to match the color of the automobile body, characterized by the fact that painted areas are formed by individual, separate exterior parts that can be directly or indirectly attached to a supporting structure.

Page 2, first full paragraph:

--The convertible vehicle of the invention ~~in accordance with Claim 1~~ makes it possible to achieve increased effectiveness in the painting line, since it is no longer necessary to paint complete roofs. The exterior parts to be painted have a considerably smaller area to be painted compared to complete roofs, so that they can be painted faster. In addition, the structure of the exterior parts is very simple, which further assists the painting process.--

Page 2, second full paragraph:

--~~In the design in accordance with Claim 10, it~~ <u>It</u> is also possible to use completely unpainted exterior parts to cover lateral regions of the roof, for example, even plastic parts produced from recycled granulated plastic or transparent glass or other plastic parts.--
